INTERSHIPS EXPERIENCE

Artificial Intelligence Intern | [Link](#)

As part of the TechSaksham industry internship program, I worked on building an SMS Spam Detection system using machine learning techniques. The goal was to develop a model capable of classifying text messages as either "spam" or "ham" (not spam), helping improve digital communication security.

Web Development Intern | [Link](#)

As a Web Development Intern at OctaNet IT Solutions, I was responsible for assisting in the design, development, and maintenance of responsive and user-friendly websites and web applications.

Generative AI Intern | [Link](#)

Codegnan IT Solutions has actively engaged in Generative AI education through specialized programs. Notably, they organized a 120-hour internship on Generative AI , in collaboration with the Andhra Pradesh State Council Of Higher Education (APSCHE).

PROJECTS

E-Commerce rymo | [Link](#)

Our e-commerce website is a dynamic and user-friendly online platform designed to offer a seamless shopping experience. It caters to a wide range of users, from casual browsers to serious buyers, by integrating essential and advanced features using AI Tools.

Employee-Platform | Job Portal | [Link](#)

Developed a full-featured job portal web application that connects job seekers with employers, enabling users to search and apply for jobs, and companies to post and manage job listings using AI tools.

Resume Making | [Link](#)

The Resume Builder project is a Python-based application that allows users to generate professional resumes by simply entering their personal and career details through a form or input interface using AI Tools.
